
PROFESSIONAL SUMMARY

Dedicated Frontend-focused Developer with 4.4 years of experience creating robust user interfaces and scalable web systems using Angular and Micro-frontends. Proficient in RESTful API integration, secure backend communication, and SQL, leveraging modern development workflows and intelligent tooling to accelerate delivery. Proven ability to bridge the gap between technical requirements and user experience, ensuring high standards of code quality and cross-functional alignment in agile environments.

TECHNICAL SKILLS

- **Web Technologies:** Angular, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap, Angular Material, HttpClient, Micro-frontend Architecture, RESTful APIs.
- **Backend & Database:** Node.js, PostgreSQL, MS-SQL.
- **Engineering Productivity:** AI-Assisted Development using GitHub Copilot, Cursor.
- **Tools & Collaboration:** VS Code, Git/GitHub, SSMS, Jira, Confluence, Sonarqube, JFrog.
- **Process & Design:** Agile Methodologies, Figma (Basic), Canva.

WORK EXPERIENCE

IT Analyst, Tata Consultancy Services | Bengaluru, KA

July 2026 - Present

TCS BaNCS

- Developing the AI Compass web application, a low-code/no-code interface within the TCS BaNCS banking platform that lets users configure, train, and manage LLM-based models.
- Built Angular UI components for the data processing workflow, enabling users to input data that is extracted, structured, and fed into the model training pipeline to mitigate reported issues.
- Implemented tracking views for model training records, giving users visibility into training history and issue-resolution status.

Senior Systems Engineer, Infosys Limited | Bengaluru, KA

Apr 2022 - July 2026

Order Management System

- **Agile Delivery & Production Support:** Collaborated in an Agile environment to translate complex requirements into technical solutions, delivering within stipulated timelines and managing production deployments to ensure high availability.
- **Micro-frontend Architecture:** Developed cross-micro-frontend communication services to enable seamless data interaction and integration between decoupled UI components.
- **API Integration:** Implemented Angular services for RESTful backend integration, delivering dynamic, real-time user experiences through efficient data handling.
- **Framework Migration:** Led the end-to-end migration of a large-scale application from Angular 13 to 18, ensuring stability, compatibility, and the adoption of modern features.
- **Performance & Efficiency:** Redesigned UI for intuitive navigation and optimized code components by leveraging AI-assisted development workflows and Copilot to significantly accelerate delivery cycles.

Quality Inspector, Layam Flexi Solutions Pvt Ltd | Hosur, TN

Nov 2020 - Mar 2022

- As a Quality Inspector at Ashok Leyland, I identified, recorded, and analyzed defects in commercial vehicle cabin parts. Through collaborative rectification, defect data visualization, and successfully reduced defects per vehicle (DPV) to meet organizational quality standards.

AWARDS & RECOGNITION

Insta Award (Certificate of Appreciation) | Infosys

- Recognized for outstanding dedication and hard work in executing significant changes and enhancements to the Maximus project.

CERTIFICATIONS

- GitHub Actions (GH-300) — GitHub

EDUCATION

Bachelor of Engineering in Mechanical

Aug 2016 - Sep 2020

Er.Perumal Manimekalai College of Engineering - Hosur
